

The Media Wiki Platform that powers the Wikipedia is used to present the research to our clients. The Media Wiki can be populated with information on patents, scientific literature and technical literature. These documents are organized in a highly structured taxonomy developed by the Dolcera team.

Key highlights of Wiki

- Security of Wiki is provided to the Media Wiki using the http secure connection
- Hyperlinks to the data sources can be provided near the content for reader reference
- Simple and easy to use
- History of the changes to the wiki can be stored for tackling potential data loss/recovery
- Proves to be an Exhaustive repository of technical intelligence with timely updates
- Personalized alerts/RSS feeds in technologies and standards of interest
- All Dolcera samples are available at [Dolcera Public Wiki](#)
