- Supplier concentration to firm concentration is high

# Threat of Substitutes: High

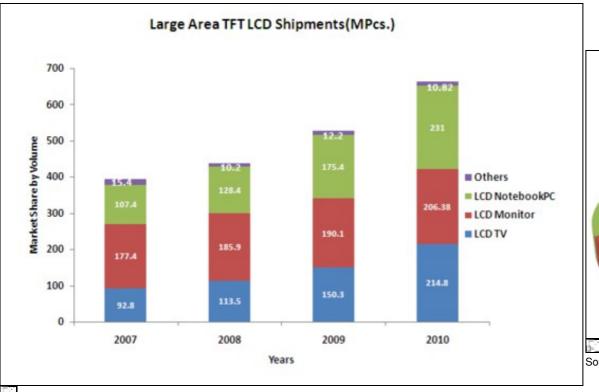

- Possibility of a Technology
   Substitute
- Relative price performance is high

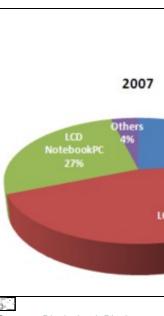

### **Analysis of display business**

LG Display accounted for approximately 30% of LGE's revenues in 2010. Display business is capital-intensive, competitive and cyclical.

Large Area TFT market

Sources: Displaybank, Displaysearc

Sources: Displaybank, Displaysearch

Year on year there was an increase in shipments for all the products of large area TFT LCD. In total the revenue grew by 25% in 2010 up from 20% in 2009. After recession and a laggard growth of 11.5% in 2008, the market has picked up and the revenue is growing.

- Market revenue overall is growing, but the most promising product and market that uses this technology is Television. With a growth of 42.9% in 2010 up from 32.4% in 2009, the market looks profitable.
  Notebook PC market also looks profitable, with a growth rate of 31.7%, but a decline from the previous year from 36.6%. The OLED technology is eating up the market share of the TFT LCD market share in this market.
